Incremental encoder mounting kits for OTIS 10AT(L) and 15AT(L)

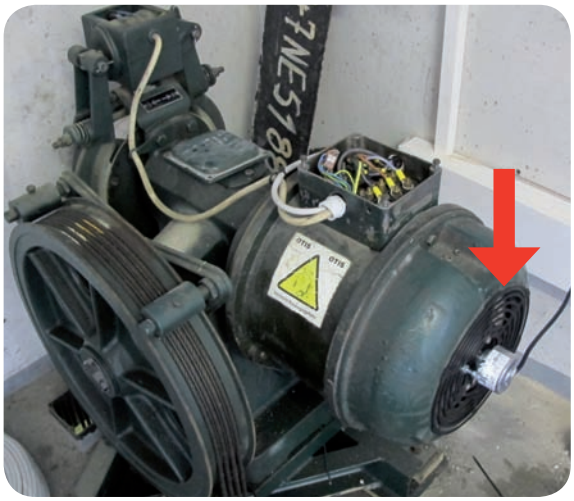
for OTIS drives of the series 10AT(L) and 15AT(L)

Example: encoder mounting

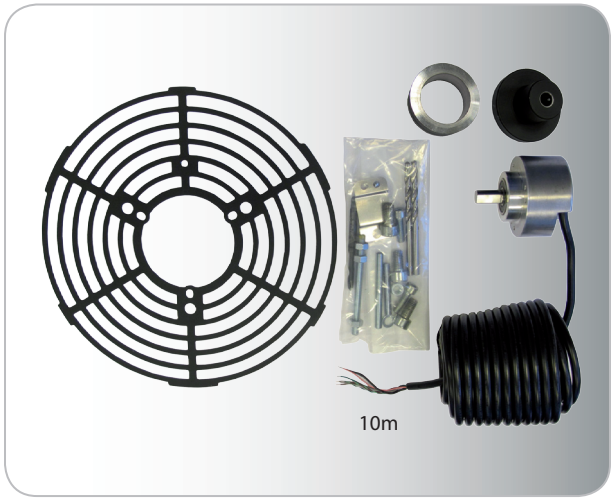
Description

Incremental encoder mounting kit for OTIS drives of the series 10AT(L) and 15AT(L).
Mounted on the ventilator side.
The existing cover is removed and replaced with a new cover.
The incremental encoder will be mounted on this new cover and will be connected to the motor shaft by special adapters.
Drills and tapping drills are included in delivery.

OTIS drive **without** encoder mounting



OTIS drive **with** encoder mounting



Scope of delivery

Incremental encoder with 10m supply line,
mounting kit for the motor shaft on the ventilator side,
new ventilator plate,
mounting instruction,
connection plan for the respective converter.

Advice
The encoder cable is delivered ready for connection to different frequency converters (see table on page 77).
A mounting instruction and a connection plan for the respective converter is included in delivery.
