

W+W Automatic rope lubricator and cleaning kit

W+W Rope lubricator kit 100

W+W Rope lubricator kit 140

W+W Rope lubricator kit 200

W+W Rope lubricator kit 300

Description

With the W+W Rope lubricator it is possible to lubricate and clean lift ropes quickly and easily.

A suspension rope consists of many individual steel strands. These strands slide against each other when they run over the traction sheave or the diverter pulley.

The ropes are lubricated which reduces the friction among the strands. It is important that the lubricator be applied in small quantities but evenly.

Otherwise the traction of the rope may be affected negatively. Furthermore a regular lubrication prevents corrosion and prolongs the durability of the ropes considerably.

The EN 12385-3 (use and maintenance of steel wire ropes) also recommends the lubrication during operation to achieve the optimal functioning.

The automatic lubrication and cleaning system for ropes from W+W is suitable for the durable and permanent maintenance of the suspension ropes.

The brushes rub a special treatment continuously into the ropes.

This treatment permeates to the interior of the rope.

The dispensed quantity is minor but continuous. It can be adjusted between 1 and 12 months/ 125ml – it depends on the size and the length of the ropes.

The treatment is conform to ISO 4346.

Mounting example: W+W Rope lubricator kit 140

Mounting example: W+W Rope lubricator kit 140 with supplementary cleaning brushes.

Adjustment of the dispensed quantity in months.

W+W Rope lubricator kits

Scope of delivery W+W Rope lubricator kit 140mm

Scope of delivery cleaning brushes

Rope lubricator kit 300 with supplementary cleaning brushes

| Art.no. | Description |
|---------|-------------------------------|
| 011200 | W+W Rope lubricator kit 100mm |
| 011201 | W+W Rope lubricator kit 140mm |
| 011202 | W+W Rope lubricator kit 200mm |
| 011203 | W+W Rope lubricator kit 300mm |

Scope of delivery

- 1 bracket
- 1-3 brushes 70mm or 100mm
- 1-3 cartridges with lubricant, 125ml
- 1-3 screw joints
- 1x mounting instruction

Cleaning brushes for rope lubricator

The use of cleaning brushes is recommended for installations with a high contamination level, e.g. in the industry or in exterior lifts.

The brush set is suitable for a maximum width of 300mm. It can be cut easily to every length with a side cutter or a small saw. It is fixed to the brushes of the W+W rope lubricator.

| Art.no. | Description |
|---------|------------------------|
| 011204 | Cleaning brushes 300mm |

Scope of delivery

- 1x cleaning brush
- 1x bracket set with screws
- 1x mounting instruction

The additional cleaning brushes are fastened on the brushes of the rope lubricator.
